

President / CEO Message

Tess Solar International Ltd was founded by congregation of professional staff consisting of Managers, registered Engineers, Accountants and Computer Scientists, and experienced technicians, secretarial, safety, medical and general support and economists on the conviction that solar power is a clean, sustainable free energy source which can be utilized to meet the energy requirement at all level of life from small unit to mega projects. Our fundamental aim is to offer reliable, efficient, intelligent systems with the compatibility in different size making huge economic and competitiveness.

Our founder: Mr. Samson Omoragbon is a seasoned financial/entrepreneur and expert, with a Bachelor & Master's degree in Banking & Finance. He has worked for most big banks in Switzerland and across the globe and retired as director.

Tess Solar International Ltd is much more than just a solar installer of photovoltaic systems. We offer an integrated model for the production of solar electricity to become market leader in the solar products. Today, the challenge facing solar energy is to become independent of subsidies and to produce solar electricity as quickly as possible at competitive prices, with the goal of achieving total **OFF-GRID** parity.

With our eyes fixed on that target, our company has a unique position in terms of competitiveness by optimizing costs by adopting intelligent solutions to enhance grid integration. In this way, **Tess Solar International Ltd** has now trusted source in this solar tech market. We believe you will enjoy the services of **Tess Solar International Ltd** and will help us in improving by giving your valuable feedback.

Generational changes and Climate change adaptation and mitigation continue are shifting society's focus toward equity and well-being. Communities are urbanizing. Emerging technology and the digital revolution are rapidly changing how we solve problems. Across the globe, economies are looking for secure sources of food and energy and near-shoring manufacturing capacity, all while managing affordability concerns.

Our purpose—empowering people to rise to the world’s greatest challenges—speaks to today’s reality. Our promise—with every community, we redefine what’s possible—inspires us to think beyond what’s been done before. Complex problems demand creative solutions, which in turn, provide us with distinct opportunities:

- Opportunities to bring people and ideas together
- Opportunities to innovate
- To blend our expertise with technology
- Improve how and what we offer clients and communities.

Because when they succeed, we succeed.

Tess Solar International Ltd makes the world more sustainable by building trust in society through innovation. In addition, we set a vision for 2030 to be a technology company that realizes net positive through digital services. For Tess Solar International Ltd, net positivity is defined as our commitment to maximizing financial returns, solving global environmental problems, developing a digital society, improving people's well-being, and bringing positive impacts to society through technology and innovation.

The world is becoming more complex, and there are unpredictable and unstable times ahead. To solve global issues such as climate change and disparity, countries, companies and academia need to work together across a wide range of challenges to enable a society where people can live safely, securely, and abundantly.

As a company, we drive these three important values in all areas of our work:

- Aspiration,
- Trust,
- Empathy.

By working hand in hand with people who share the same purpose, we will build a relationship of trust while taking on new challenges together. From there, we will expand empathy and transform it into a greater force, and together we will realize a sustainable world with you.

Accordingly, we operate with a vision to develop strong and sustainable infrastructure, emphasizing our involvement in addressing social and environmental issues and responding to global changes such as climate change, biodiversity, geopolitics, and investment decisions that take sustainability factors into account. These are matters we are fully aware of and act upon seriously under the commitment “Not only the energy, We care” in striving to develop our business to grow steadily while preserving natural resources and promoting well-being of all our stakeholders in a balanced way. This is how we aim to lead **TESS SOLAR INTERNATIONAL LTD** towards sustainable growth in all dimensions — economically, socially, and environmentally.

We are committed to growth in the sustainable renewable energy business, developing environmentally friendly energy solutions to drive the transition to a low-carbon society. Accordingly, we have developed and expanded solar and wind power plant projects, with a total renewable energy production capacity of over 1,500 megawatts across 4 countries.

Considering customers’ rising awareness of the **Tess Solar International Ltd**, we will contribute to society through our activities for carbon neutrality and sustainability, thereby enhancing our corporate value.

As we strive to achieve sustainable corporate growth, we humbly hope to have your continued support.

Sincerely yours

Samson Omoragbon /President / CEO
